Company Profile

Chengdu Organic Chemicals Co. Ltd., Chinese Academy of Sciences (COCC) is a state-owned high-tech enterprise focused on technology research and development. It was transformed from Chengdu Institute of Organic Chemistry of Chinese Academy of Science (CIOC) established in 1958.

Timesnano belongs to COCC. Timesnano began to prepare CNTs by natural gas catalytic decomposition in 1996, supported by Foundation of President of the Chinese Academy of Science, Knowledge Innovation Project of CAS, 863 Project, Major National Scientific Research Plan and so on. Timesnano has done a lot of work on CNTs synthesis and application, and a series of progresses has been obtained. Timesnano is one member of CNTs National Standards drafting. By the end of 2015, Timesnano applied for 43 patents with 15 authorized, and published more than 100 SCI papers.

Timesnano is one of the world's major CNTs manufacturers. Its R&D capability, manufacturing level and product quality are in the advanced ranks in the world. Furthermore, Timesnano is the earliest member to realize CNTs industrial production in China and realize industrial application in China. Not only skilled in R&D and production, Timesnano is also committed to the transformation of achievements. Based on the core technology achievements of Timesnano, BTR Battery Material Co., Ltd., Shenzhen Nanotech Port Co., Ltd., Shenzhen Sanshun Zhongke New Material Co., Ltd and Sichuan Xingneng New Materials Co., Ltd were established.

With the expansion of research on carbon nanomaterial, Timesnano launched graphene products in 2011. Currently, the products of Timesnano include CNTs powder, CNTs paste, CNTs array, CNTs fiber, CNTs film, CNTs film adhesive tape, graphene, graphene film, graphene foam, graphene oxide, graphene nanoplatelets, fullerene, nano-ceramic powders and their related application products, such as conductive additives for lithium ion battery, CNTs conductive heating coating, CNTs thermal radiation coating, CNTs transparent static conductive coating, CNTs conductive fillers, CNTs functional masterbatches, CNTs epoxy composite, etc. At present, the production capacity of multi-walled carbon nanotubes is 700 tons / year. The production capacity of carbon nanotube paste is 2000 tons/year. The production capacity of high-purity single-wall carbon nanotube is 2 tons/year. The production capacity of graphene is 30 tons/year. The production capacity of graphite nanoplatelet is 50 tons/year.

Timesnano will remain committed to research and manufacture work on nanometer materials, maintain to be a globally reliable supplier of nanometer materials, and try its best to make contribution to global nanometer materials career and human civilization.

Development History

Foundation of Chengdu Institute of Organic Chemistry,Chinese Academy of Science	1958
Beginning to prepare CNTs by Catalytic cracking of natural gas	1996
Realizing CNTs industrial production for the first time in China (Establishing Shenzhen Nanotech Port Co.,Ltd)	2001
Establishment of TIMESNANO business Division	2003
Launching high purity SWCNTs	2005
Develepment of CNTs-based Conductive Additives for Lithium Ion Battery	2006
Realizing CNTs industrial application in lithium-ion battery for the first time in China	2008
Establishing Shenzhen Sanshun zhongke new material Co.,Ltd	2010
Launching granphene	2011
Expanding the CNTs production to above 200 t/a	2013
Expanding the CNTs paste production to above 2000 t/a	2014

Trading Units

Timesnano offers its products in standard quantities. Trading units other than those given in this publication are not available. If you wish to purchase any product in Tap quantity, please feel free to contact us for a quotation.

Prices

All prices listed in this publication are net prices and given in US dollar (\$). Shipping and handling charges are to be added to your account (see below). Any additional taxes and duties are payable by the customer.

Prices are subject to change. Please contact us for a firm quotation. All previously published price information will become void after December 3rd, 2014.

Shipping and handling charges

China:

Shipments are routinely made by **SF express**. A shipping charge of ¥ 20.00 applies for most order.

All other destinations:

Shipments are routinely made by **FedEx**. Shipping and handling charges apply. The shipping charges depend on the destination as well as on the actual gross weight of the shipment and therefore have to be determined individually. Alternatively, shipment can be arranged through any other courier service of your choice. Please

provide your account number with your preferred courier service when Ordering. The handling charges of \$30.00 applied for every order.

Please note that not all products listed in this publication are on-stock items and may therefore have longer delivery times.

According to export regulations several products are undeliverable in several countries.

Payment

Payment is possible by Wire Transfer (T/T). Terms of payment should be advance payment. All deliveries are subject to our General Terms and Conditions which can be found on our website (www.timesnano.com).

Can't find the product you need?

If you wish to purchase a product that is not listed in this publication please do not hesitate to contact us. We offer custom synthesis of many carbon nanotubes, carbon nanotubes-based products and graphene at very competitive prices.

Your suggestions for new products are always welcome!

How to place an Order

Orders should state clearly the name, product code and quantity of each product you wish to purchase as well as your VAT-ID number. Please send you Orders by email to carbon@cioc.ac.cn

nano@cioc.ac.cn

times@cioc.ac.cn

Orders by email are preferred. You will receive a purchase Order confirmation by email or fax within 48 hours of receipt of your Order. Please let us know if you do not receive a purchase Order confirmation within this time.

Category

Nanomaterials from Timesnano

Timesnano offers CNTs (carbon nanotubes), CNTs-based products and graphene in small quantity for researchers and in Tap Order for industry groups. Our expertise in the properties, applications and various manufacturing of advance and engineered materials allows us to meet the needs of our customers.

Carbon Nanotubes:

SWCNTs

DWCNT

MWCNTs

Graphitized MWCNTs

Specific MWCNTs

Industrial MWCNTs

16 Purchase Procedure and Bank Account Information

How to purchase our CNTs and what's the process for purchasing?

Step 1: Customer place the purchase order.

Step 2: According to the requirements, Timesnanos offer the products quotation/purchase contract and proforma invoice to customers.

Step 3: Customers **pay the payment in advance** by Wire Transfer (T/T), and then, scan the bank remittance bill to Timesnano. (Email: carbon@cioc.ac.cn, times@cioc.ac.cn, nano@cioc.ac.cn)

Step 4: When Timesnano receives the copy of bank remittance bill, the products and original invoice would be delivered by Fedex as soon as possible. Usually, the shipping time is about 5-7 from China to other country.

Step 5: Timesnano informs the Express tracking number to customers.
